### Keywords:

technology, methodology, professional training, patriotic education, skills.

Primary training before conscription is a component of the system of preparing young people for military service in the Armed Forces of the Republic of Uzbekistan and is a compulsory subject held in high schools, lyceums and colleges, as well as higher education institutions. In the course of classes and extracurricular activities, initial training until the draft is carried out along with educating students in the spirit of patriotism.

The main content of patriotic education is the formation of high political awareness in students, the education of the sense of responsibility to be the defender of the independent Motherland, and educational activities that encourage them to be always ready for the protection of the Motherland. The quality of the subject of primary training before the draft, its educational value, depends on the level of military and pedagogical knowledge of the leader of the training, his moral maturity and methodical skills, as well as on conducting it based on a new technological approach.

The purpose of teaching the subject of primary preparation before conscription is to teach the subject of primary preparation before conscription to young people in general secondary schools, lyceums, colleges, and military education faculties of higher educational institutions. to deeply understand their constitutional rights and duties in the way of defense, to create a foundation for them to perfectly fulfill their sacred duty of protecting the land where the blood of their navels was spilled, the land of their ancestors and descendants, from any armed aggression military training. In addition, students are encouraged to gain faith and interest in the military profession, to protect themselves and others in emergency situations that may occur suddenly, and to preserve the spiritual and material resources of our country. is to prepare selfless and patriotic members of our society who can take initiative. Today, extensive work is being carried out to further increase the feelings of loyalty and love for the Motherland among students and young people, to enable

them to make quick and correct decisions in various situations, to expand their thinking and outlook, and to educate them in the spirit of patriotism. .

The main task of the science of primary preparation before convocation is for young students

- To ensure that they understand the basic concepts of the Constitution of the Republic of Uzbekistan regarding the defense of the country and its protection from any armed aggressions;

- The main task of the Armed Forces of the Republic of Uzbekistan

and structure, providing insights about the Defense Doctrine;

- Laws of the Republic of Uzbekistan "On Defense", "On General Military Obligation and Military Service", the Cabinet of Ministers of the Republic of Uzbekistan "Organization of Military Service in the Reserve of Mobilization of Citizens of the Republic of Uzbekistan provide an understanding of the essence of the decision "on measures";

- Concepts on the organization of training in the science of CSQB in educational institutions based on the decision of the Cabinet of Ministers of the Republic of Uzbekistan No. 348 of December 18, 2014 "On further improvement of the system of training the youth of the Republic of Uzbekistan for military service" is to give

Pre-vocational education is a purposeful process of interaction between teachers and students, their joint activities, in which education, upbringing and development are organized on the basis of innovative and technological approaches. During regular communication with them, they develop knowledge, skills and professional education.

It is appropriate for the pedagogue to carry out orderly activities aimed at realizing the goal of imparting knowledge to students, providing them with the necessary data and information, as well as practical application of their knowledge in the initial preparatory training before the convocation.

Without the student's activity, the learning process cannot take place. However, it is

desirable for the teacher to actively influence students and encourage them.

Summary. Students are trained as a military leader during the training, the formation of their skills and competences in the application of laws and conduct of work is to teach them the concept of military legislation, its principles, main directions and forms. Students of academic lyceums, vocational colleges, higher and secondary special education institutions should know the order and methodology of conducting activities during the initial preparatory training and during extracurricular hours before convocation.
