

The Role of the Designer in the Organization of Preschool Education System Based on Modern Requirements

**Nosirova Madina
Mo'minovna**

Director of the organization of pre-school education № 23,
Uzbekistan

ABSTRACT

This article discusses the modern requirements of the system of preschool education based on the rolan his body in a stylist.

Keywords:

The value of universal and spiritual, leadership, leader, is progressive, progressive, sympathy, antipathy.

As it is known, in modern uzbekistan the ministry of preschool education of the software system has been implemented in the organization, not ago, not alternative for preparing children to school, underdeveloped sufficiently flexible models, like the advanced countries in social, personal, emotional, speech, mathematical, physical and creative development, the environment was not applied to special education programs directed to familiarize yourself with the state. State pre-school educational organizations operating in secondary education-pedagogical personnel, the majority of children of school education at the level of the requirements did not allow her to prepare. In addition, pre-school education refers to the structural and organizational aspects of maintaining the quality of monitoring for that reason, pre-school education institutions in the educational process quality, efficiency and valuation of the time did not meet the general requirements. Pre-school development and implementation of state policy in the field of education of children of pre-school education with the president on September 30 2017 in order to ensure full coverage gradual "pre-school education system

and management improvement measures on" PD-5198 decree with the ministry of preschool education in china. In this decision the primary education system reform in order to eliminate the complexity of the decision problems in a wide range of activities implied, including the head of the organization of the training process effective teachers and staff, thus, modern pedagogical and information technologies from the advanced experience of foreign countries use from educational institutions highly qualified, established to provide personnel with modern knowledge.

Pre-school education system without modern requirements based organization, the children are healthy and make a fully mature adult, in order to deliver effective forms and methods of education and training in the educational process, the introduction of generation harmonious and spiritual, as well as the size of the educational process, the content and quality of pre-school education institutions in the construction and equipment of pre-school age children of healthy nutrition and the introduction of mandatory minimum safety requirements related to the organization of and is out of control. In this regard, the ministers of

the republic of uzbekistan cabinet of "pre-school education and on approval of the state standard of education" on 802 dated adopted on 22 December in the year 2020. While the main functions of the state standard consists of the following: pre-school education set the requirements on the content and quality of national and universal moral values on the basis of the introduction of effective forms and methods of nurturing, innovative teaching and the introduction of modern information and communication technologies in the educational process, education and improvement of the legal basis of the activities of quality control, pre-school education in the organization of full-fledged feeding to establish and secure sanitary-set requirements gigienik pre-school education, the regulation of the construction of the norms of the organization of pre-school education, the organization of games, toys, furniture, and other technical equipment, tools reabilitasion equipped with pre-school education to ensure compliance with the requirements of the organization to provide fire safety.

The organization of educational process quality in preschool education institutions in the role of the designer is larger. A management team, first of all, your own personal pattern display, the leader should be the leader. "Leading" is usually the word is applied in relation to the person influence and a goal. The composition of the leadership group, in which the speed of the system by the analysis of cases of persons who identify relationship. But the leader of representing the specific qualities that there are many more aspects, the analysis of the relationship within the system can not only be them. The leader in such interpretation-specific jixat another one from the main — the ability to act in accordance with the situation of the person, need to take into account. Any the difficulties that arise in a problematic situation in the elimination of enthusiastic leader topqirlik skillfully and unique features. The withdrawals associated with the problem in the situation dramatically, the leader in advanced compared to others his ministry, with the leader of stand out. Opinion, exactly the same phrase in English - "a leader" and "leading" in a

holistic way they could express the full essence of the word of the leader. In point, "leading" the word of the person to lead the group, to be led there that is calling come on out. The "leader" while the phrase is followed by a group of people who have certain qualities which the commitment of the team who believe in the growing numbers of people would voluntarily choose way of shipment. Exactly the same condition "leader" be necessary to apply the technique. This feature his emotional charm of the designer to strangers is manifested in appealing qualities.

Each employee has a certain position in the team group. Any employees with their colleagues if it's a mutual relationship, the effects of different factors dying emotionally in this relationship can begin. Based on the relationship of emotions in two form — connection (simpatiya) and not (like antipatiya) and occurs in the form that appears. So employees that there are certain characteristics of their own and the group gets aroused by many members of the team with a high position he occupies in the system of informal simpatiya. The team on the psychological interpretation of the head of the staff is considered to be the official system in the high position if it is recognized as a leader in the next place. Relatively close to the designer at the level of recognition as the leader of her emotional issues, a number of activities which are associated with the qualities of the assessment of the high and means that this person is not indifferent to the interests of the group. A - the person who is recognized by all members of the team. The main feature of the designer, the values in the system — every thing be put above the interests of the group, the group diligently to the task before take off into to put into spark and the mobilization of community members in this process that will take. In the team, first and foremost, own the features of constructivism differs with. Modern achievements in the field of the science of psychology to rely on the drawings of the designer and the nature of the way to achieve its unique qualities—there is the possibility of getting enough information about yo'rikdari.

Designer — pre-school education in the organization of methodical work to the head of the employee. Designer pre-school education and educational leadership to the activities of the organization team training methods. Ensure the implementation of education and training programs and educate children in all age groups and control. Teachers teaching team representing the opinion of the council, together with the angles of the educational work with children that take the constant activity of the body school review methodological skills, experience and advanced platform. Get to the discussion of the pedagogical council with a child education - educational work, problems and defects, the education of children of topical issues of pedagogical preparation of materials and to the council to ensure the participation of the caregivers in the organization, pedagogy, psychology, sociology achievements in the field of sciences and mature as teachers-instructional best practices, introduction to the practice of instructional and pedagogical skill to enhance explores issues such as the development of their creative activity. Besides, the teachers directing the work of the staff, control, teachers and other caregivers who work directly with children will help show the necessary methods. Pre-school education in the organization of methodical work to organize the cabinet, learn best practices, exchange of experience among teachers in the work of the organization, in order to assist them practical tips for caregivers should be held.

In said, above, the designer is one of the main aspects of the teachers care about you. Therefore, the main occupation in the sense of the definition, which the designer also this is a side of this person successfully resolved the situation will get in the way of structure can be understood as pedagogical ability and interests.
