ABSTRACT

This in the article initial class students in teaching interactive modern methods and them lesson in the process of application advantages about thought considerations is reported

Keywords:

cooperative activity , advanced pedagogical methods , modern education , innovative methods, education , lesson , knowledge, qualification , skill

In education teacher _ and of students cooperative activity and that 's it in progress of the person development, his information and education is also done increases . In lessons teacher _ own knowledge , skill and qualifications training by means of to the students delivers , readers while him mastering to go as a result from him use ability have will be Learning in the process students of mastering different from the looks of it they use , that is being absorbed information acceptance do , re work and to practice app in reaching to himself special to differences relies on Education in the process teacher and of students lesson during cooperation of students independent performance , from the class except affairs in the form of education and education issues solution will be done . of education purpose society need suitable respectively is formed . So it is education purpose suitable and proportionate to be need _ Scientific in the literature of education purpose of possibilities correct , accurate , appropriate use skill and qualifications harvest to do , logical-creative thinking development , communicative literacy increase , national the idea absorb , oriental education formation of a

person spiritual from enrichment consists of emphasized . Educational the goal based on in students independent thinking , verbal and written literacy increase , makes sense thinking development through their communication culture will be improved . Educational the goal based on while spiritual , ideological , sophistication upbringing is given Language learning in the process of the people cultural and moral values zoom in opportunity appear will be

One of the great sages one « future concern with if you live , to your children good knowledge give , teach _ _ it is In our country education in the system done being increased reforms real in a sense one or two yearly or short period to the effect to reach directed the work not literally _ _ _ one how many face for years taster change let 's say it's done error it won't be . This is our president Shaukat Mirziyoev 's " our future , the future our generation about sad , our country all my children my children , they from us according to strong , educated and of course happy to be need " _ idea at the core sagely politics lying down shows . It is known that in education advanced pedagogical and new information technologies

app reach study of training efficiency just increase it not only the achievements of science in practice apply through independent and makes sense thinking , har bilaterally perfect high spiritual person in education important importance occupation is enough Current in the day education in the process interactive methods and information technologies study in the process to apply has been interest day by day increased is going Such of being reasons one , that's it until time traditional in education students only ready knowledge to take over taught if it is modern from technologies use while them occupying knowledge themselves looking for find , independent learning and thinking , analysis do even _ final conclusions themselves _ cause to issue teaches . Teacher this in progress person development , formation , knowledge take and to be educated conditions creates and that's it with one in line management , guidance function performs _ Lesson in training game tasks repetition or strengthening in their classes if used positive the result gives _ Game-task which one type choose of the lesson type , class of students game tasks to perform training level , their educational level, independent creative work opportunities , learned in memory fast restore of creativity _ where level also depends on the formation to be need _ In education student identity to thinking , others his opinion understanding and that's it the idea oral and written in the form literate to explain _ to teach to the issue attention directed is independent _ thinking , speech culture developed literate person maturity find main place occupies _ of the nation marriage style , cultural creativity its rich history legacy based on is studied .

Today is from the teacher advanced pedagogical and new information from technologies study in the process to use Demand is doing From the above come out , our experiences based on lesson in training interactive methods apply through education to give to the roads circle our thoughts statement we will We think that it is educational training efficiency in raising to our colleagues practical help gives _ Also students _ own direction choose and independent to life preparation

skills as formation responsible task in execution their near from assistants to one becomes _

This in the article initial in classes the students in teaching modern approaches and innovations methods apply as a result of the students makes sense thinking abilities development , speech smooth , fast and right answer to give qualification formation , knowledge passion to wake up , to classes thorough readiness to see aspiration about data given _ Primary in classes , especially the first in class to the students in teaching of the student age , physiological , psychological features account get need _ In education game from technologies use , eng efficient from tools is one Game during their thinking , outlook , thinking expanded goes _ Scientists to education game through approach education in the process believed that it will make it easier . Not only that makes it easier , maybe this to science interest strengthen the child deep knowledge to get encourages . Game in the style of lessons of children oral speech development help gives _ First class students picture or with video different views very good they see Various different colorful pictures through , their speeches in cultivation from the games regularly using stand up must, computer using present in reaching education individualization principle attention to give must, now education in the process student subject to be it is necessary In this more interactive to methods attention focus education efficiency increases . Current period to classes placed the most important from requirements one independent to thinking is to teach . Today's in the day teachers pedagogues experience learning and innovative from methods , and new pedagogical of techniques their uses it is necessary Primary class education methods usual education methods a little difference because it does initial class students very young _ Education area different different abilities and persons with together working students one to the place accumulative very dynamic environment as separate stands and of teachers task each one for themselves ie of students personal needs satisfy for creative and innovative education strategies done to

increase able efficient teachers to be important

Efficient teacher to be easy the work not because _ each one student is unique , but education of strategies from the combination using , teachers education styles and of students knowledge capabilities and opportunities account in class _ students for dynamic and motivational environment Create it is necessary
