**ABSTRACT**

Improving the quality of Primary Education is essential to lay a solid foundation for the academic and personal growth of children. To achieve this, it can be effective to include modern areas of Education. In this article, we will explore some modern areas that will help improve the quality of primary education.

**Keywords:**

technology, critical thinking, project, educational process, feedback

1. Child-centered learning science: this approach sees the child as an active participant in their learning process. Encourages teachers to create an environment for students. Here, students are given opportunities to research, survey, and collaborate. The child-centered academic discipline promotes critical thinking, problem-solving skills, and autonomy, allowing children to form a love of learning.

2. Technology integration: as a result of the introduction of technology into primary education, an interesting and dynamic learning environment arises. Through the use of educational applications, interactive websites, multimedia resources, students can explore concepts in a more interactive and personalized way. Technology also helps to develop the digital literacy skills necessary for the modern world.

3. Project-Based Learning: Project-based learning encourages students to work collaboratively on real-world projects that incorporate different disciplines. This method provides active learning, critical thinking, problem solving and creativity. Students are actively involved in the learning process and develop their knowledge and skills through manual experiences.

4. Assessment and feedback: modern areas of assessment change focus from just evaluating students to giving constructive feedback to improve. Formative assessment methods such as self-assessment, peer assessment and ongoing feedback help students understand their strengths and areas for growth. This approach encourages growth ideology and encourages students to own their own learning.

5. Multicultural and inclusive education. It is necessary to establish multicultural and inclusive education with different classes. This approach forms an inclusive learning environment that respects students' diverse backgrounds, cultures, and learning styles. Encourages empathy, tolerance and acceptance among students, fosters a more neighboring society.

6. Professional development for teachers: in order to effectively implement modern approaches, teachers need opportunities for continuous professional development. Curricula can equip teachers with modern learning strategies, technology integration skills, and techniques for classroom management. Well-trained teachers are essential for the delivery of quality primary education.

The content of the fundamental reforms in the field of education in the Republic of Uzbekistan is becoming richer today with a new approach to the design of the educational process. The modern approach to education guarantees the effective management of the educational process with the help of specific tools and the results of successful achievement of the set educational goals. A modern approach to improving the quality efficiency of education in primary classes is a clearly defined system of tasks of all stages and parts of the pedagogical process, programmed in accordance with the time distribution, scientifically based and ensuring the achievement of the expected result. Educational technologies cover a certain area of pedagogical activity. Building the stages of the didactic process in a certain sequence means organizing the cognitive activity of students using selected teaching methods in accordance with the goals set by the topic. A modern approach to improving the quality efficiency of education in elementary grades - based, in its essence and content, on a certain pedagogical theory, will belong to one or another classification. When thinking about their effectiveness, it is necessary to consider how much progress is being achieved on the goal set before all educational institutions to ensure the collaborative activities of the teacher and student, who can trace the teaching process and target it. Or teaching methods is a concept directly related to educational practice. In the elementary grades, texts are given in the lessons of "reading", one of which is the text "Alisher Navoi". The text is given in an artistic and scientific style. Under the terms of the exercise, it is assigned to compare texts and determine their similarities and differences. The study of this text using the method of "Mental attack" makes it possible to achieve the desired goal. It is carried out in several stages with text based on the method.

Preparing students to understand the topic. Information regarding the methods of speech given in the past Sessions is remembered and repeated, the peculiarities of each style of speech are memorized. Because to compare texts, readers need to have enough

information regarding speech styles. Once knowledge of speech styles is memorized, both texts are read independently by readers. Readers will try to understand the content of the text.<sup>1</sup>

In conclusion, it can be said that improving the quality of primary education requires the adoption of modern approaches aimed at student-oriented learning, technology integration, project-based teaching, effective assessment and feedback, multicultural and inclusive education, and continuing professional development for teachers. By incorporating these directions, we can create a more interesting, neighboring and productive learning environment that prepares children for success in the world of the 21st century.
