ABSTRACT

The article analyzes the place of women in the society, the attention paid to them in our country, and the fact that their place is incomparable in the upbringing of the young generation and the future generation. Also, the impact of the family environment on the new generation and its ability to find its place in the society is detailed.

Keywords:

woman, upbringing, society, family, generation, birth, body, nation, behavior, root, factor, future.

To increase the socio-political and social activity of women in our country, to create conditions for them to realize their abilities and opportunities in various fields and industries, to ensure unconditional observance of their rights and legal interests, to provide comprehensive support for motherhood and childhood, as well as family large-scale work is being done to strengthen the institution.

At the same time, the state of affairs in this field indicates the existence of a number of systemic problems and shortcomings that prevent the creation of effective mechanisms for the comprehensive support of women, the organization of targeted work with them, the strengthening of the moral and moral environment in families, and their health. [1]

On February 7, under the chairmanship of the President of the Republic of Uzbekistan Shavkat Mirziyayev, a meeting devoted to the issues of comprehensive support for women and strengthening of the family institution, decree №. DP-5325 dated February 3, 2018 "On measures to fundamentally improve activities in the field of supporting women and

strengthening the family institution" is clear evidence of the attention paid to the women of our country. [2]

President Shavkat Mirziyayev defined the important tasks of ensuring the vital interests of the women of our country, improving their living conditions in every way, and emphasized that their place and educational significance is the most important factor in the education of our women, the members of the new generation of modernized Uzbekistan. It is also proven in research that upbringing is not a stage that is formed yesterday or today, that one of the main tasks is education acquired and formed in a woman's body.

A woman is the mother of guardians and lovers of the Motherland, a great and respectable breed that raised several scientists, philosophers, poets-engineers, even prophets.

Uzbek women are also the holders of this rank, the educators of the nation.

No one can take the place of a mother and a woman in making our families happy, prosperous and strong.

In our people, when such stories are used in some appropriate situations, the behavior of a family woman is revealed to those who hear from the outside.

"Apples fall under an apple", "a bird does what it sees in its nest", "model your daughter after your mother (like mother, like daughter)" and so on. [3,25]

Family is a palace of pleasure. The feelings of our women in the heart and body serve as a very important factor in making this castle strong, perfect, loyal, rational, pious. The main task is the love and education of women, whose future, behavior, and behavior of our children are above all. The raising of the issue of education of perfect and mature offspring to the level of state policy should be done not only in educational institutions and various events, but also in the atmosphere of a peaceful and prosperous family, in the soul of a woman, that is, a mother.

In some cases, we make excuses for our children's inappropriate verbs because they have changed under the influence of their friends and neighbors. But no one even thinks about the family environment at the time of their birth, what they felt with the child in the mother's body.

According to the 18th chapter of the "Hadith" created by Al-Bukhari, after being turned into a piece of meat by God: "May the child be born in a month and a day!" - if it is said, - "Is it a boy or a girl, is it happy or unhappy, how much is its sustenance, how long will it live?" - the angels ask. Then the answer was: "All these are written on the forehead while the child is in the mother's womb." It seems that the map of life is completely divided.

The Great One, who has been entrusted by the Lord of creation and has given a woman the opportunity to feel the obligation, as well as once again a priceless reward for the decision, an opportunity that cannot be equaled by any merit. This opportunity, presented as a prize, is the most important responsibility of women in the perfect maturity of our children, the prosperity of our country, and the incomparable future of our country. [4,105]

Yes, of course, if we take our women and mothers as the basis for the upbringing of our children, the kindness, respect, and some injustices shown to women are the highest responsibility.

Indeed, from a healthy mother - a healthy child, a peaceful, prosperous family - a spiritually mature future will be born. Undoubtedly, this is a pressing issue of our time.

Poets write poems about mother, write love letters about women, describe them with so many graceful and beautiful words that they fly like soft butterflies in the sky without wings, as if women are numb in the mirage of love. Undoubtedly, women deserve exactly that

A man barely moves his body in some situations, and a woman nurtures a piece of flesh in her body, like a neighbor, for nine months, nine days, nine minutes, and nine seconds. He counts the days by looking at the sun in the sky during the day, and by looking at the moon and stars at night. He feels so happy that the worries of the whole world become insignificant for him. The curtain of time turns so quickly that when the unborn child is born, unexpected news is loaded on the shoulders of a woman's delicate body like a stone. In this context, questions arise for a woman - "Where did I even let myself go!"

We can even say based on life experience that not only women, but also society, family, love, feelings have made deceptive experiences of the heart. In the course of the opportunity given for calculation and testing, the sweet and bitter experiences of life, the active state of the boneless language, and the activity of human views are considered ready template factors for the formation of a piece of flesh in a woman's body.

Therefore, a woman must be spiritually pure, pure in heart, chaste, conscientious, and spiritually rich. It will be necessary for him to behave, to be kind to the people around him. First of all, he should be able to distinguish between halal and haram. A dirty bite is very important in the upbringing of a child. Every step a woman takes, every misdeed she does, is a sign of fate for a child who is growing up waiting for his time.

A woman is created by nature to be beautiful, proud, and the foundation of the family. A woman's place is important in how a woman is created. However, the contribution of our family shield fathers in giving birth to perfect children for our women is not without attention.

A woman is beautiful, graceful, when she receives love in the fortress of happiness with her loved one, a woman is peaceful, her family is prosperous, when her shield builds a strong spell of love, a woman is patient and strong, when she does not need herself, if he is taken care of, loved, protected.

Undoubtedly, women make a mountain a garden, a ruined country blooms, yes, they certainly cause the birth of great philosophers, world-renowned scholars. It is only necessary to create a ground for it. At the heart of the creation of a peaceful and peaceful land, it will be necessary for our sons to be serious about marriage, to be tolerant of life's worries and ups and downs, not to inject poison into the sweet family, and of course to be able to balance the balance between mother and woman.

The honesty of the couple, the protection of the woman as the protector of her child, the protection of our mother-in-law as the progenitor of my child - create a foundation for the birth of a healthy generation.

A cherished, loving woman expresses the goals of building future, well-being, and hopes for the fruit of her love in a sweet marriage with her imaginary body. The lines passed from the heart give permission to the angels to fulfill the essence of good dreams, the creator, who watches over the woman every minute and every day. Look, the destiny of our children will be realized in the heart of the dreams of our mothers-women until they see the face of the bright world. [5,235]

It can be concluded that the duties of our women are the highest judge in the education of our growing children. The upbringing of our children in the short time before they are born is a great blessing for us women.

We accept all the unpleasant things around us with gratitude, even if they don't hurt or satisfy us.
