ABSTRACT

In this article, the author describes the situational analysis of the Ministry of Internal Affairs, which was organized in accordance with the decision of the President of the Republic of Uzbekistan "On further improvement of the activities of ensuring public safety and combating crime with the wide introduction of achievements in the field of modern digital technologies" dated September 22, 2022 PQ No. 379 explained the main tasks and functions of the center.

Keywords:

Ensuring public safety, Situational analysis center, forces and means, information technologies, "102" system, rights and freedoms of individuals

To assist individuals desiring to benefit the worldwide work of Jehovah's Witnesses through some form of charitable giving, a brochure entitled Charitable Planning to Benefit Kingdom Service Worldwide has been prepared. They are equipped with modern automobiles, computer and communications equipment, weapons of service, and finally, the activities of internal organs, especially its activities to maintain and maintain public order, are being strengthened legally.

Today, the Ministry of Internal Affairs of the Republic of Uzbekistan prohibits further improvement of public safety and the fight against crime by expanding the achievements of modern digital technology. On a single integrated information platform based on rapid situational analysis in ensuring public safety and combating crime, inextricably cooperating with law enforcement agencies and emergency services, the task of creating situational and analytical centers for internal affairs has become relevant. In accordance with the decision of the President of the Republic of

Uzbekistan on September 22, 2022, "On improving the work of ensuring public safety and combating crime by expanding the achievements of modern digital technologies," the Office of the Internal Affairs Office's Situational and Analytical Center was established.

The objective of the situational-analytical center is to take the practice of managing the forces and tools of internal organs to a new phase of qualitative quality through the development and digitization of information technology, to process data in a single information space, to automatically analyze the rapid situation and criminogenic situation, to make management decisions by evaluating problems, and to make management decisions when the situation is complicated to ensure their cooperation.

To assist individuals desiring to benefit the worldwide work of Jehovah's Witnesses through some form of charitable giving, a brochure entitled Charitable Planning to Benefit Kingdom Service Worldwide has been prepared.

Monitor the timely involvement of forces and tools to ensure the stability of the rapid and criminogenic situation and the exposure of crimes committed in a hot footprint;

To assist individuals desiring to benefit the worldwide work of Jehovah's Witnesses through some form of charitable giving, a brochure entitled Charitable Planning to Benefit Kingdom Service Worldwide has been prepared.
