One of the most important tasks of educators in preschool education today is to cultivate children's creativity, creativity and creative skills. This article discusses the content of the development of creative abilities of preschool children and the role of educational activities.

Keywords:

Creative ability, sense of creativity, fostering creativity and ingenuity, talent, need, invention, scientific discovery, intellect.

One of the most important tasks of today's educators of preschool education is to cultivate children's creativity, creativity and creativity, as well as the rational use of natural resources. Influences the formation of a person, including the creative principle of the child, as the main method of activity of educators in the organization of preschool education.

Creativity is not a new research topic. People's opportunities have always been of great interest to people. However, in the past, society has not felt a particular need to master people's work. It is as if talents have created works of literature and art on their own: they have made scientific discoveries in response to the needs of evolving human culture. Now the situation has changed radically. life in the period becomes more colorful and difficult. And this person needs a template, familiar actions, but mobility, flexibility of thinking, flexibility of thinking, quick orientation and adaptation to new conditions. creative approach Solving big and small problems.

If you consider that the proportion of mental labor is almost all professions are constantly growing and all the performances are transferred to cars, it becomes clear that a

person's creative abilities are the most important part of his intellect and their developmental task. modern man. After all, all the cultural riches accumulated by mankind are the result of human creative activity. How human society in the future will be determined by the creative potential of the first generation. Creative Skills - It is a combination of personal qualities that enables an activity to produce an original product of new and unique work, thereby increasing its effectiveness. First and foremost, it is the power that allows a person to rise to the highest level on their own and to have unique abilities and capabilities by nature. Through creative thinking, everyone is able to discover new, original ways of solving problems, types of actions, not by understanding and applying the knowledge they already know. Why does the development of the creative abilities of preschool children play such an important role? Creative play and art are an important part of development and help nurture the feelings of your precedent. You can help your preschoolers by creating a supportive environment and devoting a lot of time to the free development of creative activity.

Provide simple materials to stimulate imagination and stimulate play. The art of creativity helps your child develop feelings, such looks and touches. Let him have access to a lot of experimental material. Finger length can be dirty, but it's a great activity to develop emotion. Although most psychological processes develop in the form of a child, each stage rises to a new stage, and the development of creative abilities is subject to different laws. And in 5-6 years, when they reach the peak of their development, they start to fall. If, as a result of these diagnostic methods, preschoolers read 90 percent of the initial responses, by the age of 10, that number is reduced to 20 percent. Adults are usually no more than 2%. So, if you don't focus on creative development, their development may not stop even from the beginning. It's good to leave kids to create and play in their own way, but sometimes you may want to know how to change the game and use more emotion in different ways. What your child does, be it singing or dancing, give a lot of compliments. For example, I like the picture you take. You really know how to combine colors. This will boost your self-esteem and encourage your child to continue playing creatively. We have everything around us to develop a child's creative start. Observe, compare, analyze, observe natural phenomena ... Imagine what the walk would look like, the silhouettes of clouds or trees. It is known that Leonardo da Vinci used this method in his search for ideas. We have everything around us to develop a child's creative start.

Observe, compare, analyze, observe natural phenomena ... Imagine what the walk would look like, the silhouettes of clouds or trees. It is known that Leonardo da Vinci used this method in his search for ideas. The creative look of children around the world helps to produce natural materials: leaves, seeds, cones, chestnuts, sea shells, sea shells, sea shells, sea stones, sand. This method very quickly gives positive results that require positive and logical thinking with their knowledge, creative and logical thinking.

In conclusion, it is important for a child to develop his or her speech and language so that

he or she can learn to express his or her ideas orally. Invent with your little one, create new heroes, continue fairy tales, pass some fairy tales on to others. Let the child ask them to find rhymes, write poems and songs. It will be helpful for the child to listen to an association game in which they can form two unrelated things, words, and a story with them.
