

Indicators Of Sewing and Knitting Enterprises in Our Republic

Sotvoldiyeva Nasibakhan

Trainee teacher of the Department of "Metrology Standardization and Product Quality Manager" of Andijan machine-building institute

ABSTRACT

Ush in the article in our country production being released sewing and knitting of our products volume and for export laying down Europe requirements analysis given

Keywords:

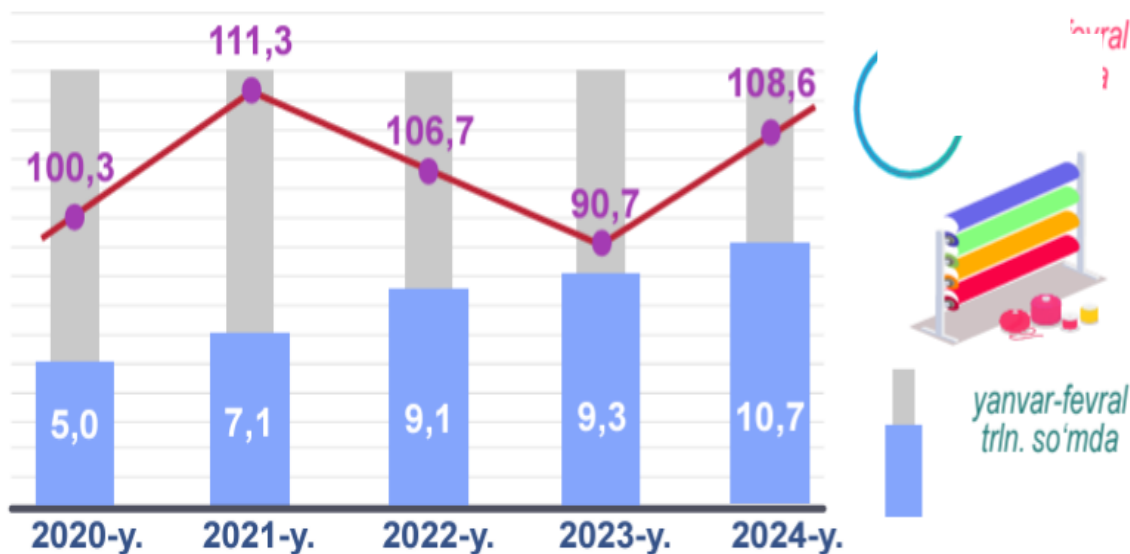

Export , International market , Oeko Tex , GOTS, BCSI, Sedex, Global GAP, Organic, CE

Today in the day sewing and knitting of products export identity by , production release happen the number about too big attention is being directed . of products uniform requirements for the organization installation to be provided international to organizations harmony processing increase with belongs to personality occupation then In this place , international and to him harmonized standards production release to the process current received and own sign as good quality and good quality to be , the world in the markets big by do it to get one today in the day national standards harmonization through products production release and union is increasing another hatti-sweat to Uzbekistan the world product and use market with active cooperation to do and the economy efficient development by wanted Most the main thing for administrative the fences by

to do production legality service , industry modernization , production release and consumption processes about provide , country organization economic sides protection about opportunities event

Textiles products production production - textiles fiber preparation and spinning , weaving , textiles gasses and ready textile by production production , weaving products and to clothes decoration to give , from clothes for ready textile by production release own about takes 2024- dependent January-February months textile products production release - of production did industry in the content share is 14.2% organize reached , passed how belongs to to the period relatively physicist volume index by 8.6% multiply and produce release 10,674.1 billion . so right came

Table 1

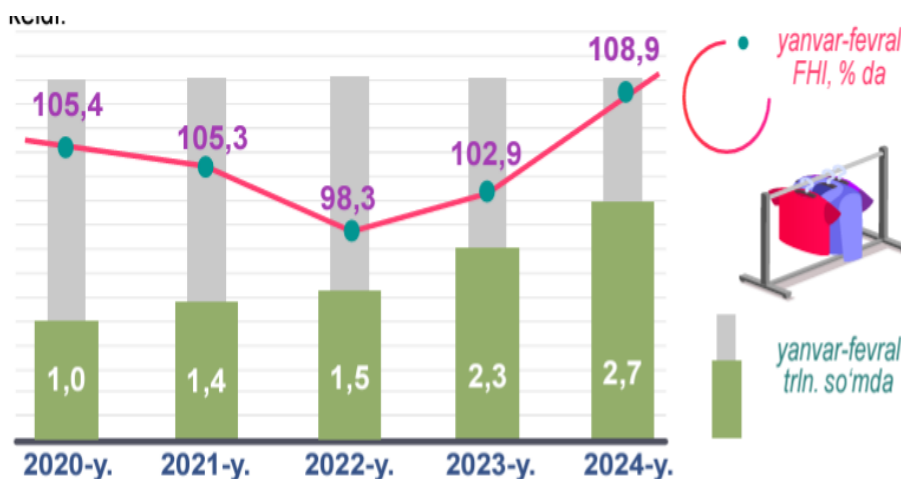

Clothing production

Clothes production release - all materials (for example , leather , textiles gauze , woven and knitting gases and hk) all bet required (ready or belongs to order according to made), of clothes all types (for example , top clothes , men , women and children for internal clothes , work , office , everyday or sportswear and etc) and

accessories production release own about takes 2024- dependent January-February months clothes production release production did industry in the content share was 3.6 % how belongs to to the period relatively physicist volume index is 108.9% organize did and production release 2,677.6 billion. so right came

Table 2

It is known that it is technical arrangement put product and placing safety , reliability , functional Muslims and quality provide through economic efficiency about important role plays . " **Digital**

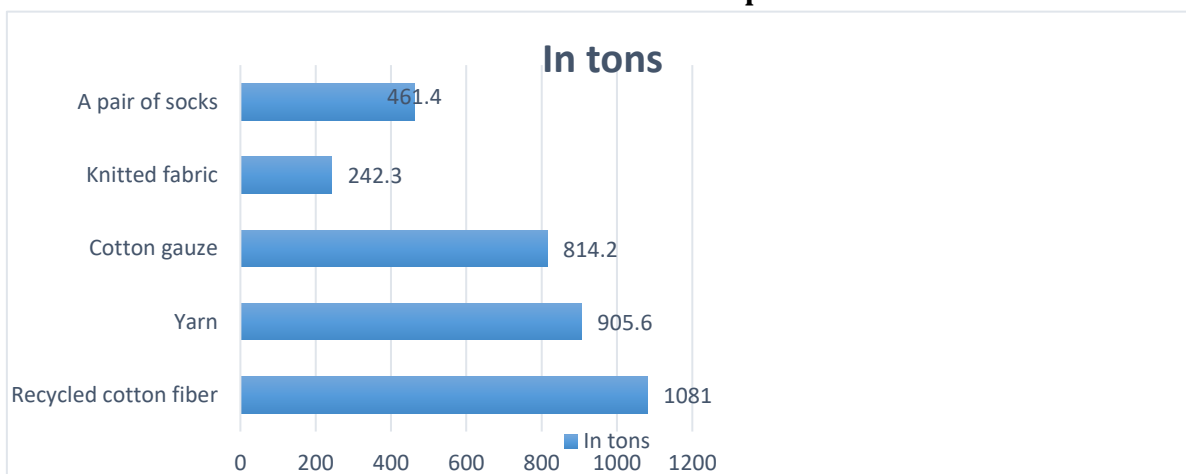

Uzbekistan - 2030" strategy - "E- Standard " , "E- Metrology " and "E- Accreditation " information systems production released for 19.6 thousand near standard international

requirements arranged and standardization common in number report share from 10 percent to 80.4 percent increased Current Created international technical regulator the number increased by 5.1 times (from 12 to 61). Export identity development place different ISO 900 international in 1 thousand 26 enterprises in the fields standard about quality management systems current was 20.6 thousand in the enterprise belongs to measures union increased , standardization (5.6 thousand), metrology (13.2 thousand), certification (1.8 thousand) will be done product) directions practical help was shown . from 640 thousand more than measure thing metrological by was conducted

Development growth at home in Uzbekistan for o' of tests another tan product in 16 countries of the world . Oeko Tex , GOTS, BCSI, Sedex , Global GAP, Organic, CE and another international standards textile 165 in industry , rural economy and food 241 in industry and electrical engineering in 61 enterprises in the industry current was Listen preferably , " Uzbekistan - 2030" strategy union about - technical belongs to arrangement put system superior task as national economy to live things provide , international , international standards current reached happen the number is 5 thousand deliver at the expense of export identity about help

The technical regulatory agency is currently assisting in the exportation of expatriate production. It is worth saying that it is possible to grow and at the same time organize seminar trainings on the introduction of national and international standards in the production of sewing tricot products and conducting audits. Production of products with high added value in the latest light industry. As the light industrial economy is important for Uzbekistan, the high maintenance of population employment ensures that the industry and industry of our country contribute to the economy. Export volumes of textile products can be considered as

the production of finished goods instead of raw cotton and the production of goods carried out for value addition.

2024 year January-February months the end 519.4 million USD textile products export union increased , general export was 14.3% organize reached and passed per year by 3.0 % increased . Export Created textile products with yarn kalava (47.7%), ready textile products (37.4%) are useful share occupied 2024-dependent January-February 496 per month textile products to 52 countries of the world export time

Table 5

2024 year January-February import in months industry products goods volume 1 131.2 mln . USD organize arrived and passed how that's it to

the period compared to 32.2 % appeared a lot and to import common in size share by 18.0 % enough

Table 6

Conclusion instead that's it to say maybe to the Jakhan market our own national our brand let's introduce and our product today the world market products with personable be to get our expression necessary Which as export from what we do hard look the world looking suitable to come our provision necessary National our standards international standards with our harmonization and test laboratories

international on the scale our equipment need Technician arrangement requirements based on production quality lakes from the laboratory transfer for new from technologies send need international from accreditation past test of our laboratories tools international recognition in the market our provision need
